

Dealing with Pictures

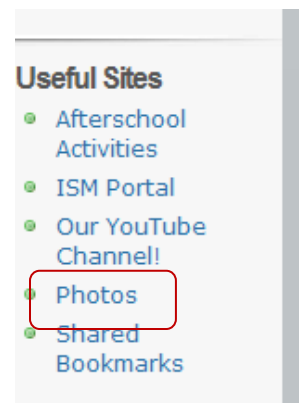

Traditionally, teachers have used the server for pictures.

		+’s	-’s
Staff Resources:	for keeping pictures for teacher use only	Secure while at school	Nobody remembers where they are. Nobody really looks at them. Takes up a lot of space.
Student Resources:	pics for student use	Secure while at school. Good for temp use.	Annoying to access from Home

However, we have a [Flickr pro account](#).

Grade 6 site

There are some distinct advantages with Flickr.

- Unlimited storage
- Open to the public
- All pictures centralized
- Accessible from anywhere.

So...

If you want to display photos **publicly**, use Flickr.

If you want to have students access and choose pictures **for work at school**, place them temporarily in Student Resources.

Move away from using the Staff Resources to store pictures.
